**DETAILED ACTION**

***Claim Rejections - 35 USC § 112***

1. Claims 1-5 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, line 3, the phrase "the drawings, images, or text" lacks antecedent basis.

In claim 3, line 4, the phrase "the inner surface" lacks antecedent basis.

In claim 4, line 2, the phrase "the inner surface of the planar surface lacks antecedent basis.

***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1, 3, and 4 are rejected under 35 U.S.C. 102(b) as being anticipated by Dubbels, U. S. Patent 3,494,322.

Dubbels teaches a card comprising folded substantially planar stock 2 and cellular bubble material 12, wherein the cellular bubble material is affixed to the surface of the substantially planar stock as an integral feature of the calendar indicia thereon.

4. With respect to claim 3, the card has two parallel folds. The first fold identified at 3' and the second fold (not labeled) along the bottom end of the folded card as seen in figures 4 and 5, wherein the cellular bubble material is affixed to the inner surface of the planar stock.

5. With respect to claim 4, the cellular bubble material 12 is affixed to card such the bubble protrude through opening in the card associate with the calendar indicia.

6. Claims 6, 7, 9, 10, and 12 are rejected under 35 U.S.C. 102(b) as being anticipated by Arnold, U. S. Patent 5,681,203. Arnold teaches card comprising a planar layer 16 made of flexible planar sheet and a second layer made of thin flexible sheet with circular shaped cups 20, wherein the second layer is secured to the planer layer so as to enclose all the circular shaped cups 20 with small amounts of air to form bubbles.

7. The planar layer 16 has indicia 23 printed thereon.

8. Claims 6, 8, and 11 are rejected under 35 U.S.C. 102(b) as being anticipated by Crosby, U. S. Patent 4,168,002. Crosby teaches a card 12 having bubble material 17 secured to the one surface. The rear of the card has spaces for receiving written indicia.

***Allowable Subject Matter***

9. Claims 2 and 5 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.
